Harris-Kupfer Architects, Inc. is a full service Architectural Firm whose founding principals have over forty years of combined professional design experience. Our extensive experience and creative design is a framework for delivering a project that satisfies the needs of our clients. Our various project types lend themselves to staff working on diverse projects within the office environment. The project types include: Healthcare; Assisted Living; Multi-Family Housing; Commercial; and Green Design projects. HKA is up to date with current environmental issues related to the building and design industries and can lead a project interested in pursuing LEED certification.
